1. GZ-4 has proved itself to be the best solution for daily commute and urban mobility. The distinctive pattern design and modern compound ensure the tire's quality of comfort, low noise, fuel-saving as well as durability on all road conditions.
2. Inside sub groove design on tread shoulder will optimize its stiffness, share drainage from main groove, and also control irregular wear effectively.
3. Multi-sipe design on tread will optimize stiffness of blocks, decrease road noise, and increase driving comfort.
4. The pattern with 5-pitch design and computer simulation is calculated on pattern arrangement to decrease noise level.

1. ENDURE M-01 has been designed for SUVs and CUVs to adapt to the modern desire for combining multiple functions and purposes.

2. The tread pattern design with innovative and sophisticated compound brings the excellent maneuverability, drainage ability, and durability on all road surfaces.

3. Circumferential grooves decrease rolling noise and uneven wear.

1. Four-circumferential groove design to enhance drainage efficiency can upgrade driving safety on wet roads.

2. Evenly distributed sipes and thin grooves on tread blocks can help to maintain the equilibrium of tread stiffness and riding comfort.

3. Fillister gripping block wall design on two intermediate ribs can enhance traction on rugged roads.

4. Broadened tread width design to enlarge tread contact patch while braking can strengthen grip and braking performance.

5. Noise-reduction tread pattern design to prevent connection between inner circumferential grooves and lateral grooves on tread shoulder can reduce rolling noise.

245/45ZR18 100W XL	4	245	45	18	W	100	11.76	677	243

1. Four broad circumferential grooves design enhances drainage efficiency on wet ground to strengthen driving safety.

2. Central Rib design provides excellent braking on straight or corner.

3. Combining different kinds of blocks cross center and shoulder, make a quiet and comfortable driving.

4. Technology of reducing irregular wear causes every block of tread to equalize loading at a high speed in corner.

5. Variable arc groove design provides best balance in reducing noise.

6. Large block design on shoulders reinforces cornering driving performance.

7. URBANO MO-16 has unrestrained pattern design and advanced compound deliver exceptional handling on high speed cornering and linear acceleration in both dry and wet conditions.
